Interim Financial Reporting [Top]

You can find a detailed explanation for Interim Financial Reporting under the Reporting section.
Progress Narrative Reporting [Top]

You can find a detailed explanation for Progress Narrative Reporting under the [Reporting section].
Final Financial Reporting [Top]

You can find a detailed explanation for Final Financial Reporting under the Reporting section.
You can find a detailed explanation for Final Narrative Reporting under the Reporting section.
The timeline tab present in the project enables users to set up timelines for various activities like narrative reporting timelines, Disbursement tranches timeline etc. Projects timelines must be set up and approved by the Fund Managers before the signature of the Grant Agreement. To learn how to set up and validate the Timelines, please refer to the dedicated article of this Help Portal: [Timelines Validation](#).

One can have multiple instances of monitoring to enable the monitoring of various stages in a project lifecycle.
The HFU will activate the monitoring instance, fill in the necessary information, and update the recommended actions. The HFU can then send them to the Implementing Partner or Cluster Coordinator, as necessary. An email alert will be sent to the IP/CC based on the party who receives the task. The IP and CC will have access to update the recommended actions only and no other data. Once done, they should send the monitoring instance back to the HFU. Once the information is verified, the HFU can update the status as “Monitoring Completed”.

Disbursement [Top](#)

You can find a detailed explanation for disbursement under the [Disbursement](#) section.
Revision Request Top

You can find a detailed explanation for Revision Request under the Project Revision section.
Revision request
(Step 1)
